 - Janet Vouch
 - Galen Colter
- Ginny Ganguet
- Rod Pridmore
- Laura Shroyer
- Molly McLam
- Nancy Hallowell
- Bonnie McGough
- Shirley Cobble
- Candice Smith and Missy Dorimus 3rd and 4th grade classes
- Michelle Tews 7th Grade Class

On November 17, 2016 from 2:00 to 3:10 we will have our Grades K-8 Hobbies Celebration in the High School Gymnasium. The parents and public are invited to come and celebrate with us.

We have chosen **Hobbies** as our overall Teen Read Week Theme at Camas School District this year. We will have many people showing or demonstrating their hobbies from 2:00 to 3:10 in the high school gym.

We will open the celebration with a skit and dance by Missy Dorimus and Candice Smith's 3rd and 4th grade classes.

That will be followed by Vicki Roper leading Amy McCabe's Junior High PE Classes in Yoga exercises.

We have people exhibiting or demonstrating such things as: floral design, yoga, pine needle basket weaving, quilting, wool felting, antique cars, model trains, woodworking, organic gardening, fly fishing, horse training, powered parachute, search and rescue dog, cake decorating, dirt bikes, photography, jewelry making, scrapbooking, water color painting and origami.

Antique cars, dirt bikes, fly fishing, and horse training will be held outside if the weather allows.

SPLAT (Special Projects Library Action Team) Idea Lab from The Idaho Commission for Libraries

Mrs. Cobble, our School District Librarian, borrowed the Lab and Mrs. Kristi Olsen, our Junior High Science/Math teacher, used the Lab in her classrooms for the month of October. Then during Teen Read Week the SPLAT Team members, Shirley Biladeau and Jeannie Standal came to our school on October 11, 2016 to demonstrate the Lab to the K-8th graders.

Mrs. Olsen's classes were actively involved with the demonstrations and had a wonderful time helping the K-5 classes. It was so fun to see the students working with the technology provided by the ICfL. There were peals and squeals of laughter all day long emitting from the Camas School District Library and it was so much fun for the CCSD staff and librarian too.

It is important for students, staff and parents to be aware of the fact that there are other things available from Idaho libraries besides books, magazines and reference books.

"The fourth grade loved the SPLAT Lab. I have introduced some coding in my classroom, but in the SPLAT Lab my students had the opportunity to use that information. Thank you for bringing it to Camas Elementary School." Fourth Grade Teacher, Melissa Doramus

"Our third grade class had a blast with the SPLAT Lab. We really appreciated the hands-on learning environment and "free think" moments. I liked that the students were able to explore on their own and be creative with their own ideas. I

appreciated the teacher help when the students had a question-they were very quick to provide an answer. Overall, it was a wonderful learning opportunity that was just as much fun as it was educational." Third Grade Teacher, Candice Smith
